ISN'T IT TIME YOU SUBSCRIBED?

After all, it's pretty risky putting down to your local comics shops every two weeks to pick up the latest issue of **Amazing Heroes**... you never know when an issue might have "gasp" sold out just before you get there.

So why not save yourself some potential grief and heartache and subscribe? Not only are you guaranteed to receive each and every issue... not only will they be dropped right on your doorstep, saving you many expensive and potentially embarrassing hours on the road... but, as if this all weren't enough, you'll actually save money!

That's right! You can actually save close to 1/3 of the cover price—and be insured against any price increases. (They do happen, you know.)

So subscribe today, and get your regular fix of **Amazing Heroes'** dynamic combination of news, reviews, histories, interviews, coming artists, cartoons, indexes, and all-around entertainment—sent directly to your home!

- 1. Check me the best 2 issues of **Amazing Heroes** plus the best selling issue **Amazing Heroes Special** for the subscription price of \$19.95
- 2. Check me the next 24 issues of **AH** plus the next two **Amazing Heroes Specials** for the price of \$59.95.
- 3. If at any time you are not satisfied, you will receive my money for all unexpired issues.

Please check the following boxes unless you are:

TRUE LOVE, HAPPINESS, & BIG BUCKS

A farewell Editorial by Art Cover

Although I've always been willing to accept a compromise concerning the look and use of Amazing Heroics lately, the truth of the matter is that as managing editor of this world-beating title, I've really had very little to do with it—although there have been times when my wife and I have struggled nightly over meals of observations about Batman, Superman, etc., all but confined states of historical proportions. Like the writer of that sentence you just read, I ain't easy thinking thoughts, particularly about comic books. Beginning in the early '70s, around the time that I wrote *Comic—Thoughts*—was a professional writing career, I rediscovered comic books and, thanks to the efforts of a few friends, purchased a few old collections consisting of back issues published throughout the '60s. I not only read the DC super heroes that had so enthralled me during my formative years, but re-read for the first time the *Fantastic Love-Dolly* and *Lew-Della Marvel Comics*—all in a galle!

bragging staff, and in search of a less-or-more experience of similar intensity, I continued to follow super hero comics, as well as books of other kind. At 60 it wasn't easy, expensive or time-consuming to keep up, but gradually, as the audience for comic shrank but the demand for product increased from loyal readers, getting up became almost a full time hobby, and my other reading interests, particularly in the last six or seven years—solidified as a skill. Since there's an occasional comic effect to such things, my word-lingo skills—especially my fiction slang—also solidified, although various other factors, including perhaps a low psychological alertness, may have had something to do with it.

The actual time I spend reading *Amazing Heroics* averaged to about ten hours a week—or thereabouts to do the great, imaginative job I thought the magazine deserved from me, but not too enough to do distance either I've learned an equal lesson, I hope, from reading all those comic strips—an experience which amounted to a vicarious reading of the books I've stored in my garage—*is* that the current comic devotion to continuity in super hero comics is perhaps the most artistically reactionary, basically non-writer approach conceivable. The genuine problem of how to believably sustain a fan-paced thrilling tale of doings in a universe where science makes sense only when it's convenient to the plot, says environmental, really has very little to do with what the writer can and what the character as a person would be like during the adventures, the '60s... or for that matter, the '40s. Some issues of science often read more like history texts when they do stories. And many titles—both teen-age books and what books were called in daily *Comic* that were published years ago, but which the books' current creators are locked into because *Art's* power counts that he can't perform the books, or 30 that how the fans—who's left from their departed brother

days of old—produce the books. Instead of personally, most especially when he had no inkling of what he'd be reading by choice who he read the wrong issues at the desks they loved as kids or which made their company owners, or their characters are locked into features that can't be changed from what the writer or editor is the paid thought of, probably because he thought "his" abilities. Often comments is marred for trivial reasons that have nothing to do with best story value—*is* a new team of creators may have something against the old team, or newly have just deserted their work on the character or the feature they had created, or might not be the best reason that not only confuses my writer, but points us the fact that slavish devotion to continuity is a no-win situation. Sometimes it's best to ignore it, sometimes it's best to follow a few guidelines—some of the character of the author's work.

Inevitably should be the rule. Characters and their stories should be consistent within certain established frameworks, and artists and editors should strive for a mood in their books that flows more than they do. It's not possible about galling about how the world's going and so on. How can characters be believable if their steps is obviously filled with new prose?

In other words, I personally believe that the paper lost comic, on the average, has reached a dead end, and the personal demands of the marketplace aren't helping the situation any.

How have I responded to this plight? Well, I've written of reading comics—but not accumulating them—for at least a year. I want to read that here on these things called books—the places where a lot of comic writers stop to get some ideas, or they're not swiping them from comics, and I thought I would explore some of the ideas of those that I've been accumulating while I've been reading so many comics and the manuscripts about them.

My putting with Fantagraphics, Inc. is a treasure as the internet. I've probably do some occasional writing for *Amazing Heroics* and *The Comics Journal*, and I've been trying to get Ken and Gery to compartment their editing principles and publish my writer to the current creative super hero ideas discussed so I can bring them for money motivation.

And I've probably continue doing many—but I hope not all—of the things I was doing while in my editorial *Comic*. I help my wife run the Midwest Commercial Vendors Bookstore at Merrimack, CA, I'm still reviewing the long number to an anthology of New Wave science fiction to be published by Blue Jay Books. I'm writing a fourth children's book for *Blue Planet* Productions, and I'm still writing an occasional TV script, *Space Clowns*, drawn by Alan Weiss, should be published by DC this year. It is hoped that by not working in so many different areas at once, I'll be able to concentrate my talents more effectively and stay the Nobel Prize for Literature next year. It's not too late if I start working sometime this week.

So, you see, I'm a life after *Amazing Heroics*. Ken, wait, I've just thought of something—

Newsflashes

FLOODS: Eclipse Comics has been severely hindered by the floods that have plagued Southern California. The home of publisher DEAN KALLANEY and Editor-in-Chief CARL HORNHAUSE has been completely submerged, as have the Eclipse Comics offices, which were on the second floor of an office building. However, Mutsaers was able to carry most of the original art up to the unharmed third floor.

Scripts whose backlogs of series a gone, they may still be available from the publisher for the foreseeable future. Also, several series have been delayed by the flood. They are: *Grail* on *Inside Avata* issue #1 (delayed by one to possibly several weeks), *Whirlwind* #7 and *Omega* #7 (set by two or three weeks), and *Scout* #9—a tie-in job by TOM YERKES (delayed by one or two weeks). Hornswe and *Scout* #8 may stay at *Omega*.

Further scheduling changes may occur as a result of the flooding, and *Amazing Heroes* will present them as they become available.

BIWEEKLY COMICS: With the 75-cent *Whirlwind*, Eclipse established itself as a pioneer in terms of independent comics for the independents. This summer, Eclipse gets the trade with a 50-cent "50-cent color comic." Airboy, by SMITHY (Steve) TRUMAN and CHUCK (Eugene) DONN. On top of everything else, it will be released on a bi-weekly format.

MARCH 5, 1982

ADOLESCENT ROMANCE FOR BLACK BELT HAMSTERS

ECLIPSE IN 3-D: *After Terror* is 3-D combines the concepts behind *After Destruction* and *Blaze of Honor*, with "Standard Procedure" by BRUCE JONES and LEE WRENDS, "Working Alone" by MARK FANDEL and JOHN FOUNDS, "Death" by JORGE DIAZ CASARELLO and "It Was Just a Matter of Time" by KEITH TUCKER. The book will ship in May at a cost of \$2.25.

Other 3-D titles scheduled by Eclipse for 1982 include *Destruction of the Amazon* 3-D #2 (MUCH), *Mr. Walker's Three Dimensional* #1, *October Honor* #1 (LORD), *Adolescent Romance* Black Belt Hamsters in 3-D #1 (CLIFF), and *Letter Breaker and Preservation* in 3-D #1 (LORD). Incidentally, the art in *Black Belt Hamsters* in 3-D is by Ziggy Holmes and TY TEMPLETON.

ECLIPSE NEWS: *Champions* is a 30-part limited series by DENNIS MALLONE and CAROL LAY, featuring the characters from the role-playing game of the same name. *Champions*, which has a monthly frequency, is printed on alternate paper at a cost of \$1.25. The premiere issue introduces the battle for the coveted *Madame Crave*. STEVE CLIFF has colored the back-up story in *Mr. Walker* #8 on a computer. The story, *My Friends*, is by JEFF SCHWERT, and

NEWSFLASHES

appeared originally in Star-Spangled #7 (this story was ROBERT'S first published work). In May, the three-issue series **WORLD OF WOOD** debuts, with an homage cover by DAVID STEVENS. The book will cost \$1.75, and will be actively devoted to spotlighting the legendary art of WALLY WOOD. Titles of the **Starwars** #4 will ship in May. The story is titled "Smash Breaks Out" and it concerns a broken find for the out of the Jwing is broken a million. The book costs \$1.95. With its 16th issue, TOM SWICK'S **Speed** will be distributed by Eclipse. With that welcome news, the price drops (and that for news) from \$1.95 to \$1.50.

MARVEL MUTANT NEWS: ALVIN DAVIS, artist on Marvel's Captain Britain, will be featured in Eclipse's **Mutaneous** and DC's **Outblown**, will print and ink the **New Mutants Annual #3**, due out in late June. Captain Britain will guest-star, as will Mojo and Spiral from the **Largest limited series**. The **New Mutants Annual** will be in with the **Alan Annual #10**, shipping September 2. **ALAN ADAMS** will pencil and **TERRY AUSTIN** will do the book, which will introduce the **X-Men's New Mutants #42** spotlight **Concussion**, and is by writer **CHRIS CLAWMONT**, penciler **JACKSON GUILD**, and color **RYLIE BAKER**. As of issue #44, **Star** becomes the artist' regular artist. **Star Annual #43** includes the penciling of **STEVE PURCELL**, and in that issue, the young man returns to his Massachusetts ancestry for revenge on the Hellions.

OTHER MARVEL NEWS: Doctor Who has been cancelled with #23. **Excalibur #18** will be written by **MAURICE SIMONSON**, penciled by **KEITH POLLARD** and inked by **DANNY BULANOW**. The book will be out in late March. The first issue of **Excalibur #18** will be out in late March, and will be double-sized. **GEORGE PEREZ** and **JOHN WOOD** are on **Green Hornet #10**, which will ink **ALBUCCINI** pencils in **Thor #288**, shipping March 25. **STEVE DITKO** will pencil **Devilbird #234**, which will be written by **MARK GREENHARD** and inked by **KLAVIS JAKSON**. The issue, shipping May 5, features the return of **MADRID** from **Capitola America**, which will be **GREENHARD** script. **Doctor Doom** is the villain in **Cloak and Dagger #18**, in which a drug connection is traced to **Laticia**. **Star Wars** is being cancelled with #102, out in early June. This issue will be by an artist, write **JO DUFFY** and artist **CAROL MARTIN**. **Risk of Spaceland #18** explores the long-standing question, "Where is Spaceland?" The issue will be out in mid-May. The next four **Marvel Press** posters will be out in May. They will be: **Thor**, penciled by **JOE JUSKO** the Silver Surfer, by **KEITH POLLARD** who is also the artist on the forthcoming **Star Wars** graphic novel, **Phoenix**, by **NICK**.

LEONARD and **TERRY AUSTIN**, and **A-Feddy**, by **WALTER SIMONSON**, **JOE RUBINSTEIN**, and artist **GEORGE PEREZ**. The **Star Wars** poster will be inked by **STEVE BAKER #1** **Magneto**, the **Beast**, **Doctor Strange**, and **Doctor Man** will guest star in the double-sized final issue of the **Star Wars** and the **Star Wars**, as **Wanda** gets birth.

Marvel Age #42 will cover feature the newest **Epic Comics** series, **Swamp Thing**. **Star Wars** the **Marvel Spotlight** will be on **Wednesday**. The book will be on sale in early June. The last issue of **Power Man/Iron Fist #125**, will be written by **JIM OWEN** and inked by **MARK BRIGHT**, and will be on sale in early June. **Marvel News #101** will be a special issue that will appear in one package. **Spider-Man #90-92**. These issues were ground-breaking when they first appeared, since they dealt with drug abuse and went on sale without the Comics Code seal of approval. **Green Goblin** is the villain. **Gilded Lily** appears in the first **Alpha Flight** Annual, by **BILL MANTLO**, **LARRY STROMAN**, and **GERRY TRUCCO**. The issue will ship May 27. In that book, Lily's special powers **Alpha Flight's** headquarter. The **Doctor Strange** graphic novel, by **JIM DAMAST** and **DAMI ONDINI**, will ship May 27, at a cost of \$3.95, and will feature fully penciled art by **GREEN**.

AARWAK COMMENTS with **Devilbird #18**, the price will rise to \$2.00 (\$2.50 in its debut Outside). The story page count will remain at 25, and the newspaper page stock stays the same.

RIGHT: From *Thunder #7*, art by *John*. See also *BELOW*: The poster is inked by *Jack Bryant*.

BARBAR, **1980** **RICK BRYANT** is the new artist on the **Bedger** beginning with #14. The title of the story is "Smash the Cognac." **Bedger** begins a trip around the world the wrong way—the **Scots** place **Smash** sets returning to **Wisconsin**. The final piece the **Scots** is **Bygone**. **Scots** issue #18 introduces an **Amulet** superhero in a story titled "Enter the Amulet."

NEEDS NEWS in **Issue #24**, the **Black Pearl** introduces the **Fract's** new weapon—a laser one kilometer long. It devastates the **Space Fleet** before being caught on the **most** farthest of a black hole. "Smash West" is the title of #25, introducing a major development in **News**: an invention to extract energy from an artificial black hole. **STEVE RUDE** has done full-color paintings for both of these issues' covers.

SWAMP THING NEWS: **RICK VEITCH** will be the regular penciler on **Swamp Thing** with #81, and the artist will be **ALFREDO ALCALA**. Former regular penciler **STEVE BISSETTE** will continue doing the covers for the series by himself. Former **Swamp Thing** star **JOHN TOTLEBE** will do both the pencils and inks for the **Swamp Thing Annual**, which is scheduled to come out between #81 and #82. **BILLY** and **Alfred** **Alcala** **Alcala** that he and **Totlebe** will return to the book to draw the last issue that **ALAN MOORE** wrote, **Adventure #18**.

Finally, the contracts have been signed for a **Swamp Thing/Monster** team-up, which will feature **MICHAEL T. GILBERT**'s horror hero. The book, **Swamp**, will be penciled by **DC**.

REVENGE NEWS: **Revenge #7** kicks off a three-part all-**STEVE DITKO** extravaganza. **Swamp** adventure begins when "The General" has kidnapped **Doc** **Mearns**, "The Exploding Room" sets to blow in its nightmare. And finally, "Shag and the Light" is the beginning of a new strip. **R&D**, **Revenge #7** is the **Swamp** **Revenge** series title, **Strike World**, which debuts in July. **Revenge #10-12** will feature the

panels of **STEVE DITKO**, **DAVID DAY**, **STEVE BISSETTE**, **CAROLINE SPANING**, **ERNE COLON**, and **RICK LARSEN**, among others. **Ms. Two #23** begins a new storyline for "See, as her way in the mental institution leaves her with an obsession for guns." In **Phoenix Page #2**, by **TERRY BENTLEY** returns returns get their **saturn** **lumpy**. Featured are "Wanda Rogers," "King-Hood," "Brooks Shields," Agent of **FU RRY**, "Oscar America," and "Leave it to Little Beaver!"

On sale two short weeks from now—5¢ our Earth is still in existence by then!**

WHAT KIND OF ALIEN IS YOUR NEIGHBOR?

WHAT KIND ARE YOU?

THE SILENT INVADION: A Science Fiction Mystery
Coming in April from Falcon Press

Coming of THE COMET MAN

Preview by Peter Quinones

Watch Howard the Duck. In the Marvel's 25th anniversary year, we have been promised a new Ultimate. And surely this new universe will feature a Hulk. Comet (using enough force to break through OZ). Only this time, we will have the technology to get up close to the most famous of comets. And what happens when man approaches Halley's is the starting point for Marvel's new limited film-series—Comet Man, so intended to preserve the same tone Halley's brightness in its caricature as Hulk.

The creators of this new book are new to the comic book world of writing, but they are longtime fans and readers. Billy Mumy might be most familiar to most as the young Will Robinson of the 1960s TV science-fiction program. Last in a pack, the two writers' albums of music with various bands, and his script as a number of TV shows. His partner is a longtime friend, Miguel Ferrer, who has collaborated with Mumy on numerous material and has directed for TV. "I went up with science-fiction pencils before them. They have taught to create a book that has the look and feel of their favorite sci-fi comics. The outline Golden Age

In December, the two writers flew from Southern California to Los Angeles and writer Southern gave to meet with the artist. Amazing Heroes caught up with them as they were in the middle of the first issue.

How the Whole Thing Began

"It began with us, along with another friend, writing a Twilight Zone script. Billy Mumy explains. "It was called 'The Coming of the Comet Man' and it had nothing to do with the comic book character. It was an exercise dealing with counterfactual Golden Age books. And the book ended with 'The Comet Man'."

Then both Mumy and Miguel Ferrer attended the San Diego comic. Mike is a frequent speaker at comic conventions. "I can see the theater and some friends I know from Comic-Con. Many requests. 'What about what we had been doing and we said we were writing TV scripts. And they said 'great, you're writing, you should do some books.' Now Miguel and I are collectors, and we'll market about comic books around 1978, so the proposal of writing for them just went 'wow!' On the way

back from the con we decided a had to be the Comet Man. And there has never really a Comet Man character, not one that has been fully developed."

Also, the fact that Halley's Comet was coming didn't hurt the sales pitch. But "the same came from the Twilight Zone script," Mumy says. "It wasn't all that but we noticed, hey, there's this comet coming Halley's on its way."

So the two got together and started drawing ideas around "The Twilight Zone script had been done for collaboration. But they found that they needed priority. "I like to leave ideas off of other people," Mumy continues. "I tried to get things finished when I'm working with someone else. I'll get to a point in a song or an idea where I'll stop." Ferrer agrees. "I think the same way. I'm pretty busy when I'm working with someone that I push me. Besides, our point of entrance are very similar. We've been friends for quite awhile, plus we've both worked in the same industry. We know where were coming from. We respect each other—it never even occurred to them that they would not do the comic together."

So they sent out the proposal and

THE SILENT INVASION

A SCIENCE FICTION MYSTERY

"THEY'RE HERE!
"HASTY! WE'VE GOT TO
"FIND ANSWERS!"

"FORGET IT, HASTY!

BRUCE JONES

Bruce Jones has been applying hard out of control for close to two decades. Active in all genres—he's worked as a writer, story developer, editor, for Marvel, DC, Pacific, Digma, Marvel, and more—he can't really claim as one of the measure men of the field.

His earliest work, Jones writes and the one in the late '60s and '70s got him acquainted with the other artists of that generation who managed DC Comics' legendary *Assignment: Earth* and *Flashback* in the mid-'70s. He became one of Warren's most prolific writers, producing countless horror stories for *Creeper* and *Zone*, including the classic *Death* (written with *Flashback* "Bender" in the '70s, he kept himself occupied by writing comics for DC and Marvel (most notably his collaborative effort of *LaZar*, a fiction novel to Pacific Comics, at the time a thriving publisher for whom he produced a whole lot of tales, writing and editing talent in collaboration with his wife April). Completed most of them: *Marvel's Alien Worlds*, *Twisted Tales*, *Somerset Holmes*, and *Starbuck* (with Pacific Comics) were among those eager to meet out, content them as editor Bob Lippert to continue his successful tales there in later of showing himself to a career in a Hollywood scenario in addition to writing as a screenplay for a Somerset Holmes novel. He is one of the most serious behind (1970s) movie stars: *The Hitchhiker*.

With Lippert's lawsuit and subsequent loss of Bruce Jones' involvement in appearing during the Spring, this

story has been applied hard out of control for close to two decades. Active in all genres—he's worked as a writer, story developer, editor, for Marvel, DC, Pacific, Digma, Marvel, and more—he can't really claim as one of the measure men of the field.

He is one of the most serious behind (1970s) movie stars: *The Hitchhiker*.

With Lippert's lawsuit and subsequent loss of Bruce Jones' involvement in appearing during the Spring, this

story has been applied hard out of control for close to two decades. Active in all genres—he's worked as a writer, story developer, editor, for Marvel, DC, Pacific, Digma, Marvel, and more—he can't really claim as one of the measure men of the field.

His earliest work, Jones writes and the one in the late '60s and '70s got him acquainted with the other artists of that generation who managed DC Comics' legendary *Assignment: Earth* and *Flashback* in the mid-'70s. He became one of Warren's most prolific writers, producing countless horror stories for *Creeper* and *Zone*, including the classic *Death* (written with *Flashback* "Bender" in the '70s, he kept himself occupied by writing comics for DC and Marvel (most notably his collaborative effort of *LaZar*, a fiction novel to Pacific Comics, at the time a thriving publisher for whom he produced a whole lot of tales, writing and editing talent in collaboration with his wife April). Completed most of them: *Marvel's Alien Worlds*, *Twisted Tales*, *Somerset Holmes*, and *Starbuck* (with Pacific Comics) were among those eager to meet out, content them as editor Bob Lippert to continue his successful tales there in later of showing himself to a career in a Hollywood scenario in addition to writing as a screenplay for a Somerset Holmes novel. He is one of the most serious behind (1970s) movie stars: *The Hitchhiker*.

With Lippert's lawsuit and subsequent loss of Bruce Jones' involvement in appearing during the Spring, this

"[At Pacific], I was really working for myself. I was a separate company that was using Pacific as a publishing house."

good at things that she may not be quite as good at. She's really a perfect match. It's worked out great at all the sets, in television and movies, but also in comics.

AND you would say difference for strength from your strength? **JONES** Well, she has a terrific business mind, much better than I do. I'm terrible at that, or at least I was. I'm getting better at it. I've learned a lot, mostly through her, about how to handle myself in a

business situation. The freedom that I enjoyed at Pacific was largely due to April, because I would probably just have ended up working for them. As it turned out, I was really working for myself. I had a separate company that was using Pacific as a publishing house, which gave me the creative control that made the books, for better or worse, mine. That was great. And she's been indispensable in Hollywood because Hollywood is a political and business-oriented town, not an artist-oriented town. She really held me up there.

But she's also in terms of creating a free writer. Specific strengths—don't look, I may be better at au-

SANDLOT RIDGES' question through actors refers their work.

do—just see with it. When it came to Jonny Lee Miller and the other boys, there was a lot more work.

AE: On *Sandlot*, for instance, would the show of way—like, for and period these American—have the confidence?

JONES: Yeah, I feel, first and April and I developed the concept and plotted the first act together, and then April and I pretty much took it from there. I did most of the physical writing, but a lot of the brain-storming was April. That's pretty much the way it works in movies and TV too.

AE: Do you ever miss directing *Escape* and *Rebound*? The line of our own *Sandlot* fans—of those fans regarding stuff you write and draw, do you still do a lot of work of your own?

JONES: Yeah, through the years I write, do a few ads, and I started in 1988, so I only drew contemporary movies and a half that would be

rough material for something to, culturally there's a line that I have wanted to run—I don't know if you want to run it either. Laugh—but was one step for them, even though there's no movie in it, so I'll be very stage it. It's never been created, so that might be interesting. Make sure you can't get the paper and take out the following pages.

AE: Could last *After* being careful the just this is not. The got to work?

JONES: Well, it was really inspired. Actually, I thought it was done pretty well, I substituted something else for them to run.

AE: Collapsing after the movie musical for *Sandlot* fans of that Jones, didn't you miss the of them at the drawing board again?

JONES: Oh, most of it was just hot wishes. I imagine when I look at it, I can't imagine why I ever wanted it. Occasionally there was a job that I thought I should have thought

behind it. Again, no chance looking another one work. I remember looking through a and I can see myself going through different phases, being moved by different things, being inspired by different things, being inspired by different things.

AE: Which artists were your inspiration?

JONES: In the process, I think, the some, more that inspired a number of—Francis, people like that. 40 Millionaire was a great inspiration. It got into the studio very heavily, and I thought that was the way to do it, and finally sort of got around to my own style.

I was always a lot more interested in writing a story than in the drawing. Comic books was only another way of telling a story. I wasn't really that much concerned with the art itself. I realized it had to be good enough that people would want to laugh at it, but that wasn't the main thing. And I think that's the opposite of the way that 95 per cent of the artists who are drawing comics look. Not all of them—I think Frank Miller is a very nice contrast with the rest, because a good example of a writer-artist—but most of them simply aren't, and that's one of the things that made *Sandlot* fans so difficult, because the artists are simply about case. The only thing they care about is the artwork. And behind that, the only thing they care about is they were artists, and in many cases that makes them terrific artists, but it makes them extremely difficult to work with. They have no sense of criticism, or consistency, the only thing that's important to them is how the story looks, not necessarily the story itself but how the panel looks, it not even the panel but the guy's pant leg, and that makes it real hard to get used out on time. It makes you appreciate what a brilliant sense of an American cartoonists get through and why he end—think of an artist, art, art—so constantly at odds with each other, they're living in two different worlds.

With one of my stars both with the same book because, really, the art is not the story. I think, mostly that the look-out of the artists and writers, but the people who buy them, I think comic books are largely sold by their look, because of the people who are buying them.

AE: Comic books are like the conventional people get the conventional drawings?

JONES: It's a children's market and children want super-heroes and they want a commercial of super-heroes and that's what sells. Because it's a small industry, an industry that absolutely must depend on an entertainment cost flow, they absolutely must sell to children. It's not otherwise. It makes it hard for an alternative market.

AE: Who would you say is a good writer/artist, an artist who does it of the year?

A HERO HISTORY OF THE BLACK CANARY

beauty to the face of our white, male world. They give us a very good description of both The Black Canary and her publishing history.

The blonde heroine in the blue bolero jacket, stirrups, tank top, breast stockings, and lace-trimmed heels was born at a time when most of her kind, if concerned fans, were beginning to die off. She appeared on the midway Thunders strip in Black Comics #66 (Aug. 1947) and wasn't originally intended to be Johnny's replacement.

In the late 40s, a romance theme in the strip automatically produced by Robert Kanigher was the female lead. She was either completely evil or operating with questionable tactics. Lauren Lambert had The Flash-girl, Willam had The Flameless, The Flash had both Star Sapphire and The Flash—old name—Gangster's assistant, the nationally famous Thunders bumped into The Black Canary, who quickly turned him into a bugle-buzzing, a sexual story source for a domestic maid—the general reaction to a girl's being chosen by comic-legend "buck" Slade.

In using the trick to catch the girl, Black Canary intended to

berlanger Slade and steal the valuable girl. Slade had stolen Black Canary, though, planned to return it to its rightful owner. Slade caught Black Canary riding her bike and ran alone to kill her when Johnny came to her rescue with some friends, if somewhat capricious assistance. The Canary assumed Slade and slipped away with the girls, leaving Johnny lambshead and his Thunders-buck supporters.

The early Black Canary was a comedy, but not one who stole only from other comics. Since she didn't appear in the next issue, she was probably intended to be, like The Flash-girl, a recurring character that belittled the hero with her good looks and ambiguous moral nature. But there was something in the character that most had stuck. Editor Willam Maxwell or story editor John Belmont, however, after a couple years in issue #66, Black Canary was slugging Johnny Thunders' strip (in DC #2).

Additionally, the characterization of the Canary was altered slightly. It was still a suspense figure, jumping into Johnny's life from out of

nowhere, but there was no longer a trace of wrongdoing on her part. Black Canary married within the year, though the police were quite slow to catch on to that particular fact. The story usually would have Johnny stumble onto Black Canary's investigation or prevention of a crime. They'd both be captured and placed in a death trap where either Black Canary's quick wit or Johnny's Thunders-buck would save them.

By now, Black Canary's character traits were taking root. She was a woman's world, interminable courage and a tremendous spirit that refused to be defeated no matter what obstacle she was in. She possessed a broad-edge of justice, a very logical mind and was extremely calm and creative in pressure situations, but what brought her to victory most was that amazing reflex to get up. Black Canary possessed a complex mind and determination that made DC's most colorful female, Batman and Captain Landis.

Indeed, even when Johnny Thunders looked over more indication that before Johnny became more aware than comic relief in what had been for seven years his own zip.

of his around his eyes and mouth. The Soviet leader's reactions to the press were a mixture of bewilderment and delight with Starlin. On late and somewhat distant, she stuck her tongue out at him, and he said, "The Soviet people's reaction! As it was, Black Canary and Dr. Fate had to live with media sites in the S.A. [Soviet] program, with their reactions appearing more less frequently.

A Chapter Closes: Another Opens

Justice League #71 began months ago. But Knight was disappointed when the quarterly comic book, coming in the late 60s, he understood as a man and encountered the real world reality. Apparently, the men found that Starlin's world explained and without it sounded strange and took the real, growing Starlin planning to the world's side of the best of a mystery, Larry and Diana have.

Realizing they were both out of their league, Drake reached to Black Canary and called on her to do battle with the god-like enemy living out to destroy the world. But she wanted his real, old-fashioned world. So Dr. Fate realized that they were all out of their league and equipped the first. Thanks to Dr. Fate's intervention, they don't have to be. However, they don't have to be. However, they don't have to be. However, they don't have to be. However, they don't have to be.

When he was in the Justice League #71, but he never knew a continued to fight the good side. He was in the Justice League #71, but he never knew a continued to fight the good side. He was in the Justice League #71, but he never knew a continued to fight the good side.

Earth's Green Lantern and a team to lead Aquaman. When he saw the best, Aquaman held it back at its own, the team was reorganized into a strictly comic book. Aquaman's role was to lead the team, now in the form of a giant fish in his bound, continued to lead the team, now in the form of a giant fish in his bound, continued to lead the team, now in the form of a giant fish in his bound.

Larry Lance did Green Arrow's job. She lived in the same, but he was in the Justice League #71, but he never knew a continued to fight the good side. He was in the Justice League #71, but he never knew a continued to fight the good side.

Overcome by a tragedy for his

side in her accident. Black Canary abandoned her former friends and any family she might have had in Earth and went with the Justice League to Earth to start over.

Why? The psychological reasons are far more and wider. Green Canary's life was probably as follows: "Woman Woman had recently departed the earth for reasons of her own and her own, she was in the Justice League #71, but he never knew a continued to fight the good side.

After she was in the Justice League #71, but he never knew a continued to fight the good side. He was in the Justice League #71, but he never knew a continued to fight the good side.

story written by her creator, and the team would be created here, and Black Canary reached out to her. That it was not surprising, she would reach out to as best and perhaps a person. However, she would not be in her state of mind. What was more surprising was her reaction, when she was in the Justice League #71, but he never knew a continued to fight the good side.

After a similar incident, however, she was in the Justice League #71, but he never knew a continued to fight the good side. He was in the Justice League #71, but he never knew a continued to fight the good side.

But she was in the Justice League #71, but he never knew a continued to fight the good side. He was in the Justice League #71, but he never knew a continued to fight the good side.

Her heart shattered by her lover's death and Barbara's demise, Drake sought out that world's Larry to see if she could escape his pain. The Larry, though he wanted and planned his own, she was in the Justice League #71, but he never knew a continued to fight the good side.

The story showed off Barbara's talent for strategy, her position of her own, she was in the Justice League #71, but he never knew a continued to fight the good side.

After she was in the Justice League #71, but he never knew a continued to fight the good side. He was in the Justice League #71, but he never knew a continued to fight the good side.

After she was in the Justice League #71, but he never knew a continued to fight the good side. He was in the Justice League #71, but he never knew a continued to fight the good side.

The only trouble was that Green Arrow was going, naming the nation's United States with Green Lantern and a Guardian of the Universe to lead the next part of America's future in the coming century was searching to guide her out and the Dynamic Green. Dr. Fate was in the Justice League #71, but he never knew a continued to fight the good side.

What they found was a woman with a living body and a second mind. Black Canary had been that in the white space when she was in the Justice League #71, but he never knew a continued to fight the good side.

Naturally Black Canary's good nature was not over (she was great), with a little help from the living body of Green Arrow. The fact of the matter was that the Black Canary of the film would never have allowed it to happen in the first place. She was in the Justice League #71, but he never knew a continued to fight the good side.

They had been married for many years and were in the Justice League #71, but he never knew a continued to fight the good side. He was in the Justice League #71, but he never knew a continued to fight the good side.

After she was in the Justice League #71, but he never knew a continued to fight the good side. He was in the Justice League #71, but he never knew a continued to fight the good side.

After she was in the Justice League #71, but he never knew a continued to fight the good side. He was in the Justice League #71, but he never knew a continued to fight the good side.

power he usually had it with quiet and the "inexpensive" but dimensional sound effects of the character. In some power was a bit to top it is frequently as one frequently in the Black Canary comic intended to what the new talks, speech, and, up, up.

My Favorite Co-Star

After some researching from the character and some local work within the Indian community to ensure her use of purposes, Black Canary joined Green Lantern and Green Arrow on her last stop, though, as out on the continental level.

She worked as an official of the Coast Guard, who was not just patting the eye of Green Lantern, nor that of Justice, after she did, tried with difficulties to the planet of the Coast Guard in the, a phone where, due to the attention of Madge before she could return, something important just no operator, especially a woman of child-bearing years, was particularly sensitive.

In her role as secretary Madge Kane, Black Canary proved her worth by defeating a live fish monster that had become her enemy, and the monster, who used Green Lantern like a toy, last but by no means least, her, the implacable, over-achievement was back.

But that didn't her relationship with Green Arrow played out as a character covering, most with a Green Lantern. Green Arrow as a character began and in each of those regular spots in which they were together. In her role as secretary Madge Kane, Black Canary was not only a secretary but also a Green Arrow's secretary, supporting him in his efforts to protect the world from the many evils of the world. She was a Green Arrow's secretary, supporting him in his efforts to protect the world from the many evils of the world.

When, though, she would visit, a Green Arrow was never a character intended to be protective, but, but to know where to look at and let the better light take charge.

For while a typical plotline for Black Canary looked for a Black Canary and John, she would have to go along all of Green Lantern's for later to Green Arrow, because, then the power was a girl, instructor at a private school for children run by a former mad freak and a little revelation girl he was, but not as a character that is Green Lantern's (see).

It probably didn't help her case when Green Arrow helped expose her to the fact that she would be Green Arrow again and look a job as Black Canary, trying, anti-charm to be removed from previous career.

called the "Women's Resistance League." That afternoon turned out to be a trap for a group of the Green Lantern group members plotting to break his out of prison. An Adventure with a One personing subplot of the story was within of the last. Green Arrow remember a Green Arrow failed to escape, rather than 28 years of prison experience on her last.

Finally Danak went back to what she had done and general interest in the City. Green Arrow's body, Danak for the last few years, Black Canary had a major reason, in DC comics, occasionally appearing into and according to the story, the whole and kind of her mother allowed. Usually, though, she was a child or again for in another character's negligence, usually with Green Lantern, Green Arrow or the Justice League. Struggling to show about going powerful, jobs, and usually being defined as little more than Green Arrow's friend.

Along the last, two important scenes appeared that drew some light on the woman who, for about 20 years, had never looked into prior to her releasing for John's (see).

The last was her origin, presented as a special "Secret Origins" issue of DC, Special Series. Her story, in Green Canary, told us that the Dark Lady had been in her relationship since the '70s and used it there was not able as the family Richard Drake was being, with his little girl while a crop, whether Danak's last is not.

She said she had it, but wanted to be more, please, her. It also introduced her to her mother, a store owner and social lady named Jane that when Danak applied to the police force was rejected. Richard suffered a heart attack and died, so Danak decided to follow her street mother and become a street prostitute. The struggles of Richard and others motivated her to continuing background and the became a confidant friend.

The greatest I have with the story mother around the parents, one more and one more. First, I had a highly improbable that the ambulance, with anti-authorities Larry Luthor would be a cop or at least, enough on the last to be permitted to play before, said. Canary was recently legal Larry's support personality embracing her of the story, just as he hoped that Danak always kept the cap at some length, where she could keep an eye on her.

The major point is with Danak herself, the always tried Danak to live, as if it, "and she would always, and the worst could escape from a girl who was virtually, failed by her father and was, mother about, proving her. Danak was kind and caring and helped Danak the adult was right and right, but Danak the child was right.

The second point is her relationship with the various businessmen that had prepared up over the years, such as why Black Canary took to

Another scene from the film's original production of the Justice League.

Green Arrow and is quickly after the death of Linn Luthor. He is the last scene, where she was the last scene, and she was the last scene, and she was the last scene.

She found out the answer to that question, along with the reader, where she was the last scene, and she was the last scene, and she was the last scene.

The pair also found the dead bodies of Larry Luthor and the last Black Canary, who had been long, in order for almost 15 years, and a total of 220 the fall they was removed. The Black Canary that had been removed, around on Earth, was the child of Larry and Danak Luthor.

So Thomas's story told of a lady girl born to a former costumed hero and her mother's husband, and if it will be the World, saving, embrace for All Star All the people a cure to the side so that they would simply into, sometimes years of potentially destructive power.

Death were to her friend Jeffrey Thomas, encouraged them but since he had to go to Linn, and he was around the situation. However, the Thunderbolt could only offer to place the child in a major crime and make her in the Thunderbolt position, where her power would be hidden. Later, both parents, appeared.

Then later when Black Canary was taking the camp with Superman from Earth to Earth, she began to experiment enough to push a truck containing DC Superman, because that she has been caught in relief from the deadly incident, and in a way, told not living of the same environment, that he killed Luthor.

Before then, she asked to see her little girl, who she was the mother of her at 20. Danak asked if the girl could somehow take her place and with a fairly extreme situation by her husband and Superman. Danak's mission was to be placed into her daughter's hands, which she was allowed to control her own power. Later Danak asked her again, even though she was being her mothers last.

It was an epic story, explaining all of the events and the characters of Black Canary's second life, it comes. It was highly logical that the Black Canary story as if it were a different person, with late memories and a traumatic childhood to affect her behavior. It was, it was to be the last scene, the last scene, the last scene.

mother speaking and the ones who deflected her, what her own personality, looking on.

After with the original child, her last to die. The situation, they died—like Thomas, in a copy, even and only implied her death, having her option open for a revival of the original, possible back on Earth. The movie, though, change in which into a more modern, justice to the present. I've always liked Black Canary and thought she had the potential of a rich, costly, the proper character, was to be her personal issue.

In watching the article, I've had a personal respect for the character, given what afflictions Black Canary did receive with her, and against people, who, that would have, and published in the areas of comic books. She started with two children, against her and survived to have her own character, and the proper of character, with the Thunderbolt that refused to die in the face of economic or criminal hardships.

Green Arrow and the last scene, a lady girl, that did her best, and what he was talking about, her.

This is BILL KROPPFALSER's first article for Amazing Heroes.

In this scene from JUSTICE LEAGUE #226, many of the members of the Canary's past are revealed.

BAN THE SUPERMAN

Father than a New York Times editorial? After proving that the First Lady of the United States Able to keep back Superman at a single board in the summer of the comic book. Today the comic book industry is stronger than ever, nationwide as a sign. However, during the 60s and the 70s a controversy arose that threatened superman and hence comics with a fate worse than cancellation, it was the fate of censorship.

The next terrible news associated with comic censorship in Dr. Joseph Wirthman, book developer of the movement focused on the relation ship between comic books and juvenile delinquency. Wirthman's book was a major catalyst in the October 26, 1954 session of the Senate Subcommittee on Juvenile Delinquency.

Before legislation would be passed, the controversy was blown to superhuman proportions in newspapers and magazines. It got going to show that two superman men's discussion to stand.

Four years after the trial of Reed Brown his first article the comic book controversy reached the media in a New York Times article dated July 11, 1943, the Children's Book Committee of Child Study Association, revealed its findings after studying 600 comics. Their main objection to comic books were the possibility on violence of subject matter, the cruelty and cheapness of format, the extent of young eye, and the possibility of later for better reading.

The Committee concluded that "the remedy lies not in forbidding, but rather in broadening the child's total experience and providing him with activities and interests that will compete with comics for his time and attention." According to their study, the lack of interest in reading matter "might be wider if other books were as easy to come by for the child."

A week later June 18, 1943, the New York Times printed a letter originally published in the July newsletter of Forum Parents. Pen for Will Clayton, Eric G. Suggsman writes from England.

Templemore was still another "No!" We had to take all the children from one and bring them out of the library. I remember I first ever told you the important part the American family needs play during their night when the children must remain awake. They have paper is allowed for comic books in England now. I consider it now that a resolution were the trouble to send the children more of their

unreadable back on the States, some are labeled a "waste of time" and we said to Child children is "escape from real duties" by non-owned parents. Over again, the Children's Book Committee of Child Study Association begs to be analyzed instead. The Committee notes, it is not that children use comics for escape, but to have they always used books, and its in-

one main reason for banning. This is a waste of time only if we believe that children's lives must all be spent in some which will be educationally and culturally profitable. The fact is that we do not always know whether or not we should restrict their "wasted time."

Five months later, the voice is the headquarters of Child Study Association of America. One hundred teachers, librarians, parents, and some politicians are present. Dr. S. Harcourt Peckard, Assistant Director of the Bureau of Child Guidance of the Department of Education, speaks. "While let your child read what he wishes," he tells them, "and please, someone, read their favorites!"

Joanette Park, Child Study Association member, tells all that "the conflict among between parents and kids were the subject might be far more harmful (than the present confusion) in itself could ever be."

Peckard describes comics as "a child's first emotional, social, and intellectual life. It is the child's first life, his adventure and escape from reality. Even adults identify themselves. Through comics, a child can safely live his fantasies and express his aggressiveness and hostility toward the world."

On the other side of the world on March 1944, a Tokyo broadcast reports the Japanese people are going to have "the propaganda and enlightenment power" of their comic strip industry by launching the "fighting spirit."

The Japanese Government will set up a "Comics for Asia Center: Strip Study Society" to start a "large distribution and sale of the comic strip industry in the United States and Britain, to their nations."

For those outside to learn the negative aspects of comics, the White House makes the news on the subject in 1944, the First Lady, Eleanor Roosevelt is asked about comic books. She replies, "I cannot do better than others, but certainly the associations in some of them are distinctly undesirable." Initially, the President's wife is asked about the handling of mail making comics and spending large amounts of money on their items, she becomes, "quietly displeased."

Despite bad publicity, comics prosper. In 1945, 70,000,000 books and advertising are sold. In 1946, The New York Times reports more than 2,500 classrooms use Superman book books to teach reading. It wasn't until 1949 that books seriously entered the comic book controversy. Comics are beneficial and detrimental was the decision of six book critics making in separate vote to 12. According to one set, comics are mentioned, not harmful or harmful. "We inside the

discussion in the book," said one supporter, "and by addressing the copyright, library and library of the form, we develop these parts." Lamented another, "I had comics brought out to be written as carefully thought the idea that the whole world is made up of crime."

A New York Times book reviewer "Comics Demanded by South Africa" in March 1946. In Pretoria, South Africa, American comic books are considered as "subtle propaganda of gangsterism" aimed at the "racist, and emotional tendencies of the young." These quotes come from the National Council of Women in South Africa.

Reverend Robert Southard, a professor at Rockford College in Rockford, Illinois, states that comic books are "among the most effective instruments of propaganda because they are read by all the lowest level of awareness." The committee by the name that superman are "difficult to break to each, especially when they are considered as such, such as bringing Red Cross drives, and they are asking the war effort."

Three more super humanists are in Southard's words "a kind of duplicate of the Chinese child with paper money" and "paper social classes of the fascinating fantastic and colorful world of them." He claims by asking "how can the notion of battling violence and not be impressed through the lines of their lives, when you cannot even feel pain?"

A worried mother from New Jersey wrote a letter in January 1947 about children of boys. One week later again, we read that mothers, especially parents delinquents, have gotten into 100-1000 children's literature to make parents and making comics, reader magazines, etc.

For years, women's organizations had worked against the woman but never had given up. In 1949, a newspaper article expressed concern on the contents of comics for children.

The comics which our kids study today are like the juvenile novels on the subway train, are covered chiefly with American sports champions, hero stories and adventures. Some give them a sense of the abnormal world, including, drinking, smoking and all kinds of human sins. Some are too numerous to mention, along with excited nightmares in adult human life such as vampires, phobias, and various and the like. All these things are like parts of the abnormality of U.S. children. As they try to control the uncontrolled portions of their own sensory motor, that a blood-curdling shriek in the night, followed by an agonized sobbing and the silence, is common.

Indianapolis police attacked courts in August 1947. Comics were described as "one of the contributing factors of the case of juvenile delinquency" and "unrestrained, built-up, untrained, and untrained boys." The police argued all civic, religious and historical games to children all comics and literature are "elemental to the youth of the nation." Accordingly, American mothers were helped to protect their kids from the "bad books."

A woman's story in Pittsburgh blamed the 1947 death of 12-year-old Billy Bender on comic books. Although the girl enjoyed a reading of 6000 comic books, she was killed as a contributing factor in Bender's death. The boy was found holding a knife in his hand. He had told the police that he saw a "mystery reader" of comic books and "probably bargained with an invisible man concerning his life."

Comic books continued to get bad press in 1948. Two boys, age 11 and 12, died a plane in Oklahoma City and 130 miles away. They claimed flying the plane was easy and that they learned how from reading a comic book.

Dr. Frederic Wirthman was named Director of the Queen Emergency Response Readjustment Center. He reported they were gaining wide acceptance of the situation. He stated that reading comic books, newspapers, Wirthman admitted he was against comics.

In a general study, Wirthman mentioned "typical" comic book that had 147 pictures, in it, including "shootings, stabbing, burning and dismemberment in a set of 600. A total of a boy suspected of murder who claimed comic books were "indispensable."

A month later, in July 1948, a group of seven publishers implemented a self-censoring plan to encourage them to "voluntarily

By Brian K. Busch

inspiration of youth." The publishers are usually "representing to you that a kind of comic book could, with the following code of editorial standards:

Other clubs that are organized in such a way as to show sympathy against the law and justice or to inspire animosity with the cleric for instance, his comics shall show the cleric or monk in a role of crime committed by a youth. Policemen, judges, governmental officials and reported institutions shall be depicted as stupid or ineffective, or represented in such a way as to inspire respect for established authority. No amount of satire however, any western comic should not be published. No differing should show a female character or under the hood and in no case more than a bathing suit can really mean in the United States. No amount of abusive language should never be used. Being should be kept to a minimum and used only when essential to the story. Character should never be treated humorously nor represented as glibness or showing ridicule or attack on any religion or moral group it never permissible.

Dr. Fredric Werhahn again made the news on September 15, 1948 when he called for an ordinance to protect children from "publications by comic books." He accused comic books of "teaching... criminal or unsocially adjusted ideas, and creating an atmosphere of alcohol, tobacco and crime."

The end of 1948 saw a law on the books. New York had forbade the sale of comic books to anyone under the age of 16. The books affected were those which prominently featured "an account of crime... or which depict by use of

drawing or picture, accounts of an obscene or immoral character, juvenile delinquency, excessive violence, or the commission of the crimes of sexual assault, burglary, kidnapping, mayhem, rape, incest, pedophilia, prostitution, crimes against nature or violation."

In 1949 comic books were segregated into two groups. There was a comic book ban on the U.S. Post and Paul Funchal School in Astor, New York and a public law by the Civil Rights in Bureau New Jersey awards were given to the artist who collected the most books to burn. Also in Washington D.C., the Army Chamber Counselor Council ordered further crime and horror comics from stands at army post exchanges.

Mayor James Conley of Boston, in 1949, appointed a "commission" to review comic books sold in local markets. His choice was James Conroy, an attorney-at-law who was a member of the Boston Bar. The Board would set up its meetings with various publishers by law or organization.

The day came February 23, 1949 when the Board passed the Feinfelt Bill to regulate the public sale and sale of comic books. The bill, sponsored by Republican House Leader Robert W. Feinfelt, prohibited comic books from being published on the newsstands unless an application along with a \$1 fee for each book, had been made to have its name in the law page. If a permit had been printed or not, any comic not approved would have to be filed with the District Attorney at least 30 days before going to sale.

In Canada, a bill passed in the House of Commons on December 5, 1948, making criminal offense to publish or sell comic books depicting "any crime or containing obscene matter."

Dr. Lawrence Avelin of State Teachers College spoke out against censorship before the American Education for the Advancement of Science the same month. He reported that comic book readers are only reading their titles relevant to escape the reality of "atomic bombs, machines, and confusing life situations." He continued, saying "children reading about heroes" may achieve a vicarious release of anxiety and a closer they need."

Avelin did mention "inner" comic books saying some of them "inspire those readers, to be little boy with the beam of a chair, the air above of a water and the spirit of the heroes of a gorilla." He concluded by saying comic book sales are about one-third of 1949's magazine trade. "They are here to stay," he insisted.

The Appellate Department of Superior Court in Los Angeles found the ordinance banning the sale of crime comic books unconstitutional on December 28, 1949. The court ruled the same law would have prevented the sale of adult books promoting the assassination of Abraham Lincoln.

Adults against comic books were slowly changing an environment by a letter written to Child Welfare Agency in 1950. Bulletin Lee, at Union Theological Seminary in New York writes, "Comics featuring brutality and violence are merely instruments which glorify the tough guy." Lee adds, "Comics that glorify in depicting violence should be completely outlawed, overt and unrelenting to provide young people with safe and up-to-date materials which give meaning to life."

An article in *Christian Century* dated March 10, 1953 laid out six criteria before electronic books.

One should be taken... not to exaggerate the harm done by the comics; nor to assume false responsibilities of the good to be performed by checking down on them. A California study showed that a large proportion of the technical reading in schools, including 72 percent of school teachers, is fiction where there is reason to believe that the pub-

lishers of the comics... started for their profit, have launched a fairly extensive policy of anti-censorship. Finally, as their books and a social movement the cure would seem to be a combination of interest in better reading on the part of youth, and a social effort to judge the publisher... but for the time and effort. Making the most of popular taste is not easy, but what has happened in the field of music in this century is the last twenty years shows that it can be done.

THREAT!

A new monthly comics magazine from Fantagraphics Books

199 Jim Davis

a quality but brilliant guy named Jeremiah Doreau, and a lovely lady named Jennifer Cole, who is both beautiful and strong.

Cut it to the chase, where the original *Blue Beetle* did introduce a sci-fi superhero, while *Saint* (Sainted Comics) and *Amulet* (a novella that will be coming to its final issue).

Conflict on its own adds considerable yet more character. Marty Belmont, a scientist, also had to help on a project that will have later implications, and police lieutenant Max King, who has decided to investigate the death of Dan Green. He also mentioned original *Blue Beetle*. In this role, you probably wouldn't wish that Belmont was the scientist for months, and I imagine you'd wish the leader to stay with you.

Ready to roll with another starting fight against Facta, culminating in a full-on ending, and you have some more settings (some scenes which is exactly where you have to do here). I might disagree with one of the challenges but aside from that, the book delivers the perfect amount of original ideas.

Don't take me to be high praise—I would much prefer that you had given it a story that was closer to standard, but it made no real readers and was able to tell its story in a reasonably clear manner. He will be able to tell you the details of *Blue Beetle* is a part of the *Sainted DC Universe* without being too technical. I mean, I thought I am someone who is a *Chicago* magazine is looking a photograph edited by James Chase is there to get some other story here.

The biggest complaint in this book was directed over the assumptions made of Jennifer Cole. In a *Sainted DC* world, she added something to the early success of another *Blue Beetle*. The story of her is a *Blue Beetle* who is a *Chicago* magazine is looking a photograph edited by James Chase is there to get some other story here.

Those of us who remember the *Beetle* from his mother-in-law's stories are a *Chicago* magazine is looking a photograph edited by James Chase is there to get some other story here. The *Beetle* who is a *Chicago* magazine is looking a photograph edited by James Chase is there to get some other story here.

The *Beetle* who is a *Chicago* magazine is looking a photograph edited by James Chase is there to get some other story here. The *Beetle* who is a *Chicago* magazine is looking a photograph edited by James Chase is there to get some other story here.

presented and established early line of *Blue Beetle*'s profile.

If I stated that you have to be a *Chicago* magazine is looking a photograph edited by James Chase is there to get some other story here. The *Beetle* who is a *Chicago* magazine is looking a photograph edited by James Chase is there to get some other story here.

FUTURE

In July from **Revolution**

Howard Chaykin, one SHADOW: a cartoonist with wit and style.

It begins with a weakened partner in Africa, bound to Clair Baxter, the author of a new mystery novel. The partners are dispatched somewhere where the initial is based with a knife through his neck, changing him to an unknown figure.

And in the Himalayas, a representative who has not been seen in America since 1969 begins the long new home.

On New York City's 42nd Street, a man of deep faith (a dwarf) called back to his partner and set out for him. A small computer named Clifford Marston is found floating mysteriously inside a water cabinet in a house, a home in place.

And through the land of one that Marston, it is a quiet but not a man in a field, his name is David. David is a man who is a man. A group of children, named in the book, is called David.

The end target is a cartoonist named, who is a cartoonist. The attempt is to make his own, on the side of which to publish the legend "The Shadow Box" for the reader to follow. Many more stories are told of the world, a world of a world.

SHADOW—and he knows how to use them.

Accompanied by his daughter, Mary, they journey to the polluted water of the polluted sea. Mary, from the sea, is a woman who is a woman. The women of the sea are the women of the sea. The women of the sea are the women of the sea.

They are the women of the sea. They are the women of the sea. They are the women of the sea. They are the women of the sea.

The women of the sea are the women of the sea. They are the women of the sea. They are the women of the sea. They are the women of the sea.

They are the women of the sea. They are the women of the sea. They are the women of the sea. They are the women of the sea.

By the way, the women of the sea are the women of the sea.

dependent of the past, and it is a story that is a story. It is a story that is a story. It is a story that is a story.

And the story is a story. It is a story that is a story. It is a story that is a story. It is a story that is a story.

JACK KIRBY PETITION

I, the undersigned, believe that Marvel Comics should place no conditions upon the immediate return of Jack Kirby's original art. I regret Marvel's shameful treatment of and ingratitude toward its most inspired, imaginative, and productive founding father, without whom there might not be a Marvel Comics today. Furthermore, I wish to express my appreciation and love for Jack Kirby, who, by his unparalleled talent and his life-long devotion to comic book art, enriched the lives of comics readers everywhere.

Has Betty Bristle Off Her Than He Can Chew?

Regarding "Amazing Heroes #82," I did want to express my views on John Byrne's part in the "Big Red 17" (I had Byrne's opinion), mainly because Superman is Superman #800. Myself, knowing Superman can use his gullible and naive; can Sam Swoosh save me more better, but for Superman had been my teacher, the new Kryptonian version of "Mr. Universe" for Sam Swoosh's Superman handle, but the figure was again and another. The Superman looked like an average middle-aged man.

Byrne said he was like a "spring" who allowed to work like a lot of other artists (like) the Superman character a complete loss of other artists. Byrne has even at it based Superman look to resemble Christopher Reeve's image.

The article says that Amazing the public. Byrne will continue writing and drawing his Marvel assignments. Amazing the Marvel Society's Guide really reported that Byrne will leave the incredible task as of about #110.

I don't support Byrne in case of not respecting the fellow's former relation like Linn and Superman. This manner is an impediment in the public's connection as in the comic book's connection between Linn and Linn DC. Some things are not meant to be changed—like Superman's costume. To make it interesting, Byrne should have Linn Lang, King Cole and Linn Lang—like Superman (I don't know how you—G).

Byrne's creative hand Superman's powers are taken. Superman already has such limits as Kryptonite, red sun, and magic. Superman has already been "knock out" of the sky" by such ultra-powerful beings as Bood, the Kryptonite Man, Mafioso, Salsomon, Gemini, the Spectre (remember DC Comics' Psycho #26), and most recently the Anti-Monitor. Also, eliminating the time travel is very interesting. Seeing Superman itself is how while the year back by a progression with an engaging concept. Indeed, Superman has been doing that for so long, it's become one of his hallmark attributes. Although Superman could travel through time, he couldn't change history.

AMAZING READERS

Eliminating Superfate is a great move since that series had like a pretty lot of Henry. Although I feel it seemed out of place in the Superman mythos. However eliminating Superfate will destroy a vital part of the mythos. As a fan, Superfate has been around since 1949. That's too many good stories to burn to decide "there will be no Superfate." The Superfate feature evolved the image of Superfate and Superfate has been a centerpiece of that organization for years.

As for Luffo, it seems to me that one reason he has hated Superman would be his long tradition of "Superman" games. This is why Luffo developed those "space planes" as

SOME TIMES A WINN
 OF THE CIVIL WAR A
 BUCLE OF THE DAWD
 CAN BE JUST AS DAMN
 TOO AS A FIST

the '70s and, later, hated Superman for causing him to lose his face as a message that as he gets older Luffo would be for instead. More precisely in his hatred for Superman in a 1944 story called "The Congress of Superman" (Action #275). Luffo's decision that did not only have the "strong" as Superman, but he also wanted to "make the world think that he is a Superman master."

I was a member of the "Big Red 17" and I think I know more than he can do this time. It is disappoing to change a character who is the epitome of modern American mythology.

★ Personally, I don't think we should imagine that John Byrne will more than he can do (how could we?) actually with what he's impugned us in other words, because he's got a chance. —DC

Defending the Circle

The letter a reader's the letter was sent by Jeff Malton in AH #84, left completely out of circulation for one year. DC would not post his article letter. I'll have one question. When did DC post any Circle letters, or at least mention and publishing stories like Jeff Malton's? I'd like to see why the "Secret War" book was so popular. He then speaks of the multiple earths, a concept that after years of being a comic commodity, became a point of ridicule. I'd like to see Linn and Linn DC and Jeff Malton. Mary Wellman above directed who would live and who died. Most fans have heard of a publication an educational and managing editor.

There is also a statement saying that some of the multiple earths such as "W" don't have their own sets. Of course, if I'll see a true fan, I'd love that Earth's books had a title and it was cancelled because some thought it "kiss" earths like would not be a thing because the war had ended. Thanks to the JLN&M. So much for the idea of potential news readers.

Obviously you forget that Crisis was a 10-issue series and no real explanation of psychological trauma in relation to earths as it was created. You've probably discovered as a result of Crisis #12 that only Invulner-

side (where Kamandi, Omei) were kept out. Finally (PREFACE) DC's continuity book will be published sometime between 1985 and 1987 and we continue to see DC advertise and advertise they "assume" or not stand clear on the fact that they were published and were, for the most part, accurate.

And when Alan Williams had no lawsuit line for the character of Supergirl, I'm sure every person who ever read a story involving her will agree that her role in Crisis was her first moment. After all, almost every Supergirl story outside of the Legends was not history gone. I'll admit those who had to be led to believe that he had the almost exact role of The Flash and then he calls to earth—after a week or two and copying in the hands of a lawyer and a message that killed heroes, villains, and antiheroes—positives and negatives. You must know that there will never be another character as "born as Barry Allen" (MAY, being a surprise, Jeff) because she always now has an obligation to appear really into their origin and the character's actual death, so, as in the case of Molecule, serious injury

He was equated to a nation periodically in children, helping those who needed it to safety. There was no mystery of his color and I did do for research but know that this "new" Molecule was to be the original's partner in history. The NEW NAME was to be "LA GUY" (The Cap and obviously we was left back and changed due to the fact that Molecule was to be issued during the Crisis.

Finally, I'd like to address your statement that DC Comics cars letter for their longtime readers. As one, I and all DC fan know that we are a responsible owner could not do for them. For what they have been labeled for attacks on their continuity due to a new story not meeting with a story published 20-40 years ago. Now, as that many years and his answer is to give a letter stating that someone could do because in 1950 he said that DC has taken a firm stand on what has happened in the past, is taking place now and the general direction the future will take. I, as one, am proud to have Crisis contribute to the history of the book, as well as other books and the independent, although that the comic industry would

fall to the level of the Secret Wars embroilment and the general level of the Marvel line.

Despite the fact that you lettered print, I do not believe that those than half a handful of real comic fans were displeased with the Crisis clarity.

**BILL D. MIDDLETON
CINCINNATI**

Problems with Marvel

Your letter is always one of the most interesting parts of this magazine and issue #83 was no exception. Your criticism has both surprised me for a lot of reasons and I need to know that someone hasn't spoken to the man in the letter in the name giving George Pérez credit for his complete work on Crisis because that the comic industry still has its dreams of integrity.

George Pérez was always looked for through I agree with most of what he said about the current state of Marvel Comics but there are a few points I disagree with him on. First, as his market consciousness at Marvel, he unfortunately gave the impression that most characters in the women field can't hold a candle to the old job. This is a very simplistic view of things. And besides, you just can't blame a few unrepresented talents for such obvious failure.

My biggest problem with Marvel is their passing original and contemporary policies. I think their recent treatment of Jack Kirby, a man and wife leading the market with products of unquestionable quality has hurt the industry as much as it has possibly helped. I am also sick of makers, they catch it and comic book fans seem to keep the same mediocre items for more than one year. Another thing that really bothers me about Marvel is their seeming unwillingness for the opinions and desires of readers in general. I can't remember the last time I saw a letter page in some of their comics and the attitude of any negative letters that I read in the past is the same. I feel it seriously impedes any claim to objectivity that this company once had.

All in all, it was a serious loss and collecting your card about Marvel, and details the three have been listed. I would like to see your comments on the average, I suppose 10 percent of all the comics I buy each month are Marvels. The Avengers and the X-Men are a good idea that they have not met, and very nice like Clark and Digger and I suppose Superhero are very pleasing. I'm a factor that you're to be thanking.

It only for the fact that it is the only Marvel comic that was not under the thumb of Dan Claxton. I also enjoy reading Marvel's Epic line and even though some of these titles have been out since, comics like The Day, Time Square, Doctor and So Fast Series make me very glad I started collecting comics about about 20 years ago. I would, however, be glad to see recommended steps made of Marvel's color books. The quality of comics like The Spectacular and Capt. America at an all-time low, and this year has produced a record for the volume of being non-comics by this company.

It wouldn't bother me to complete the same team of Marvel's current problems. After all, DC, Marvel, and Ford have all suffered similar problems in the past. Marvel, however, with comics like the New Mutants and Iron Man, it seems to have been better at restoring its personal momentum. I can hear you say, "Oh, no, not another one of those guys." But give me a chance and I hope the following will at least make a little sense.

First of all, I am not protesting censorship in any shape, form or fashion. If something affects me personally as a magazine reader, the company or person responsible for it will very quickly lose my patronage. I feel much the same way about hard-core pornography. Most comic books are, and even when being, but I still defend the rights of any adult American to purchase such material as long as it has no similarity with the Comics Code Commission and Bill of Rights.

So what the fact has all this got to do with comics? Well, it's not as much as you might think. There has been a big lag in the New Mutants. I have Delta years ago. I am sure the future is bright because of the success of Requiem. I'll give you a hint as to what I'm getting at on the cover of Marvel's one that you would want your son or daughter to collect with this. This character in particular has met one of the most depressing points of my life. I have not returned in contacts. To date, I have not to see a child as a comic star that has physically and mentally developed as I think was in this one. Along with I was very surprised with the ending of Iron Man. It, I think, with everybody else that was dumb enough to read them, was wondering how in the world Marvel could produce that kind of thing. I think it's a credit to the creative staff who made her though that she would mostly be forced into a "bad" ending and disappointed that they take of a semi-realistic ending. I really can't believe how sick and negative some of Marvel's ideas are

there are. It's really strange how often Marvel and many in London can be so hypocritical it appears to cater to questions of moral duty. First, it really makes me wonder why Marvel hasn't published a special comic on child abuse. When read of their stories about child abuse they are often more dispassionate to youngsters than anything that would actually happen in real life. Similarly, it disturbs me that a comic such as Wonderchild (which is a very well-written and story-driven comic) is so much more about heroism and the comic industry because it considers a little more about and gives them the same comic story while this may be true, I still believe that most children had a strong underlying need beneath the surface part that they were chosen to be the story

element what they put concerning how they were portrayed in the comic book. The moral theme of this magazine was good and true, and as this writer the one who had been able to defend many of their books, I must say that their responsibility to the book was not to entertain or add to its knowledge to children and thus does not conflict with the previously stated beliefs. The New Mutants and Iron Man, however, are available to look at any comic shop and I think that while long run, this may have questionable moral and moral effects on the children who read them.

So what have I proved was the least? Perhaps nothing, but first again of nothing else, it has made me feel a little better personally. The first stories of Spider-Man and Captain
